Chapter 1: Overview

The CRSP/Compustat Link-Only files are a subset of the full CRSP/Compustat SAS and ASCII data files. The set consists only of files used for linking the CRSP and Compustat data. These files are intended for use with the CRSP SAS and ASCII stock files and Compustat data files that contain GVKEYs and IIDs.

There are 9 files included in the link-only product:

Link Files	File Extensions
D_FiscalPeriod	
LinkHistory	
LinkFiscalPeriodAll	
LinkFiscalAnnualDefault	SAS: *.sas7bdat
LinkFiscalQuarterlyDefault	ASCII: *.dat
LinkFiscalSemiAnnualDefault	R: *.rds
LinkFiscalYTDDefault	
CompanyHistory	
CompanyHistoryCST	

- **D_FiscalPeriod** - Metadata file with calendar and trading date ranges to fiscal year and month mapping table.
- **LinkHistory** - This is the “raw” link file that holds what is in the production CRSP/Compustat Merged Database for use with CRSPSift and CRSP Utilities. This file is included for the following:
 - It provides continuity for users of the current link history
 - It works well “as is” for calendar-based links
 - It offers transparency
- **LinkFiscalPeriodAll** - This file contains the links for all fiscal periods in the CCM Fiscal files. This includes:
 - Missing links - no PERMNO for this period
 - All Fiscal Period Types - Annual, Quarterly, Semi-Annual, and YTD
 - All Links including non-primary, duplicates, etc. with a rank number assigned
- **LinkFiscalAnnualDefault, LinkFiscalQuarterlyDefault, LinkFiscalSemiAnnualDefault, LinkFiscalYTDDefault**
 - These four files are the Rank 1 for each respective Fiscal Period Type
 - These four files are identical in structure to the LinkFiscalPeriodAll table, even though two fields FiscalPeriodType will be uniform for each file and LinkRank will be 1 for all
 - These files make transparent the values used for PERMNO and PERMCO for the fiscal period files so that CFZ and CLZ subscribers can “compare” work
- **CompanyHistory** and **CompanyHistoryCST** - History of company-specific information, identifiers, and codes
